Preface	ix
Universality conjecture for all Airy, sine and Bessel kernels in the complex plane GERNOT AKEMANN AND MICHAEL PHILLIPS	1
On a relationship between high rank cases and rank one cases of Hermitian random matrix models with external source JINHO BAIK AND DONG WANG	25
Riemann–Hilbert approach to the six-vertex model PAVEL BLEHER AND KARL LIECHTY	39
CLT for spectra of submatrices of Wigner random matrices, II: Stochastic evolution ALEXEI BORODIN	57
Critical asymptotic behavior for the Korteweg–de Vries equation and in random matrix theory TOM CLAEYS AND TAMARA GRAVA	71
On the asymptotics of a Toeplitz determinant with singularities PERCY DEIFT, ALEXANDER ITS AND IGOR KRASOVSKY	93
Asymptotic analysis of the two-matrix model with a quartic potential MAURICE DUITS, ARNO B. J. KUIJLAARS AND MAN YUE MO	147
Conservation laws of random matrix theory NICHOLAS M. ERCOLANI	163
Asymptotics of spacing distributions 50 years later PETER FORRESTER	199
Applications of random matrix theory for sensor array imaging with measurement noise JOSSELIN GARNIER AND KNUT SOLNA	223
Convolution symmetries of integrable hierarchies, matrix models and $\tau$ -functions JOHN HARNAD AND ALEXANDER ORLOV	247
Universality limits via “old style” analysis DORON LUBINSKY	277
Fluctuations and large deviations of some perturbed random matrices MYLÈNE MAÏDA	293
Three lectures on free probability JONATHAN NOVAK	309

Whittaker functions and related stochastic processes NEIL O'CONNELL	385
How long does it take to compute the eigenvalues of a random symmetric matrix? CHRISTIAN PFRANG, PERCY DEIFT AND GOVIND MENON	411
Exact solutions of the Kardar–Parisi–Zhang equation and weak universality for directed random polymers JEREMY QUASTEL	443
Replica analysis of the one-dimensional KPZ equation TOMOHIRO SASAMOTO	451
Asymptotic expansions for $\beta$ matrix models and their applications to the universality conjecture MARIYA SHCHERBINA	463
KPZ scaling theory and the semidiscrete directed polymer model HERBERT SPOHN	483
Experimental realization of Tracy–Widom distributions and beyond: KPZ interfaces in turbulent liquid crystal KAZUMASA TAKEUCHI	495
Random matrices: the four-moment theorem for Wigner ensembles TERENCE TAO AND VAN VU	509
